Knowing Your Data: Security and Compliance Issues

College Commons - 260 Ramseyer Hall

Wednesday, April 6, 2016 from 1:00-2:30pm

Register at <http://go.osu.edu/DataSecurity2016>

Special Guests

Gary Clark

Director, Information Risk Management
Ohio State University Office of the CIO

Laurel Dean

Associate Director, Export Controls Office
Ohio State University Office of Research Compliance

Amanda Rinehart

Assistant Professor, Data Management Librarian
Ohio State University Libraries

Joe Roush

Chief Information Officer
College of Education and Human Ecology, Ohio State
University

Join us for an in-depth look at the rules that apply to data over the entire research life cycle. We'll review the OSU Institutional Data Policy and take a case-based approach to investigate data types and their classifications, how they can be shared and stored as well as security and compliance issues. We will also discuss how this information should be integrated into federally-required data management plans.

We will answer questions such as:

- In what ways can you and others interact with your data (who, when, where and how)?
- What policies and people are available to guide your decisions?
- How can you ensure that the data you collect is secure?
- How can you safely manage sensitive information?(Which hosting services are okay to use?)
- What should you do if you suspect the loss, unauthorized access, or exposure of institutional data?

This workshop is intended for all interested faculty, staff, and students. If you have any questions, please email Rebecca Chacko at chacko.9@osu.edu.
